After I saw Albert slow down selling I talked to Connor to make a test on the market -> buy aggressive for one day and add buy support for next days .. we thought either sellers step up again and sell us down to start .. or we might start a new mid term up move .. and the second happened .. since we started the move there are roundabout 5 people adding buy orders frequently and buying

The CEL we bought on top of the weekly purchase on the first day (300k CEL @ \$0.37-0.39) we took from the 1.2M CEL we were asked to buy as soon as Albert stops selling
